COMPANY OVERVIEW

DPAnalytics LLC is a U.S.-based enterprise technology company specializing in AI-centered, cloud-driven ERP and asset intelligence platforms that redefine digital transformation across Oil & Gas (Upstream, Midstream, Downstream), Manufacturing, Shipping and Logistics.

We build mission-critical software ecosystems that empower organizations to monitor, predict, and optimize operations across assets, supply chains, and human resources.

From real-time IoT integration to AI-powered business intelligence, DPAnalytics bridges engineering precision with digital innovation, delivering platforms that are secure, scalable, and globally compliant.

Through our hybrid structure, we partner with DPAnalytics Solutions Nigeria Ltd, Cybersys Technology Ltd, and DPIndonesia. We combine global oversight with local execution, ensuring compliance, innovation, and measurable value across every implementation.

VISION, MISSION, AND CORE VALUES

Our Vision

To become a global leader in digital transformation and asset intelligence, enabling industries to evolve from reactive operations to predictive, data-driven ecosystems through AI, Cloud, and IoT technologies.

Our Mission

To transform operational complexity into clarity through AI-powered, cloud-based solutions that enable organizations to operate smarter, safer, and more efficiently while driving informed data-driven decisions and achieving sustainable profitability.

OUR CORE VALUES

Innovation with Purpose

We build solutions that solve real-world problems.

Technical Excellence

We are committed to engineering superior, high-performance systems.

Integrity

We operate with transparency and honesty at all levels

Client-Centered Execution

We prioritize our clients' success in every project.

Measurable Impact

We focus on delivering sustainable, quantifiable value.

Transparent Collaboration

We foster open communication with our partners and clients.

ORGANOGRAM

OUR SERVICES

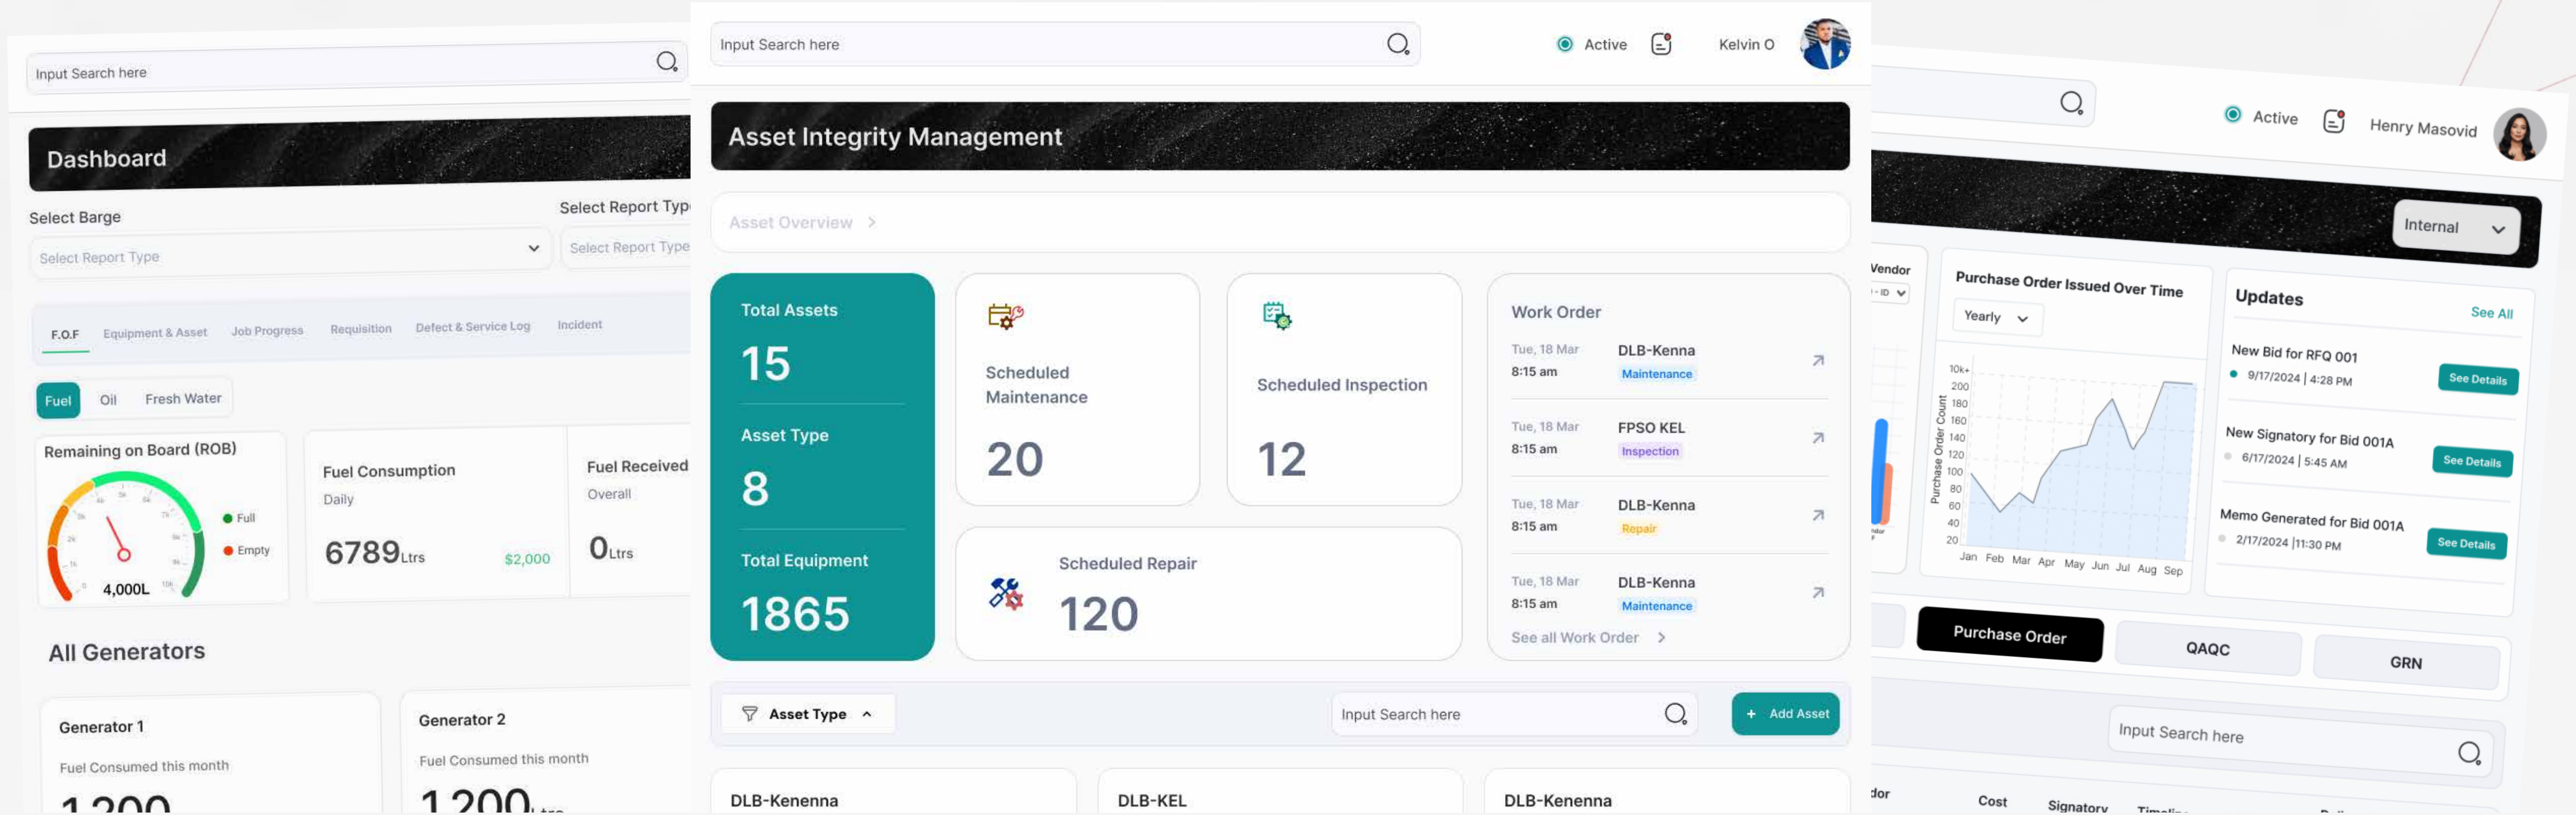

We offer a comprehensive suite of services designed to modernize and optimize industrial operations.

Custom Software Development

We design and engineer enterprise-grade software solutions that address industry-specific challenges across complex operations. Every solution is built for scalability, security, adaptability and empowering organizations to streamline workflows, reduce costs, and achieve measurable ROI.

IoT & Digital Transformation

We connect assets, sensors, and processes into a unified digital fabric. By integrating IoT, AI, and automation, we unlock predictive visibility, optimize equipment performance, and empower industries to transition from reactive to proactive operations.

OUR SERVICES

We offer a comprehensive suite of services designed to modernize and optimize industrial operations.

Cloud Infrastructure & Deployment

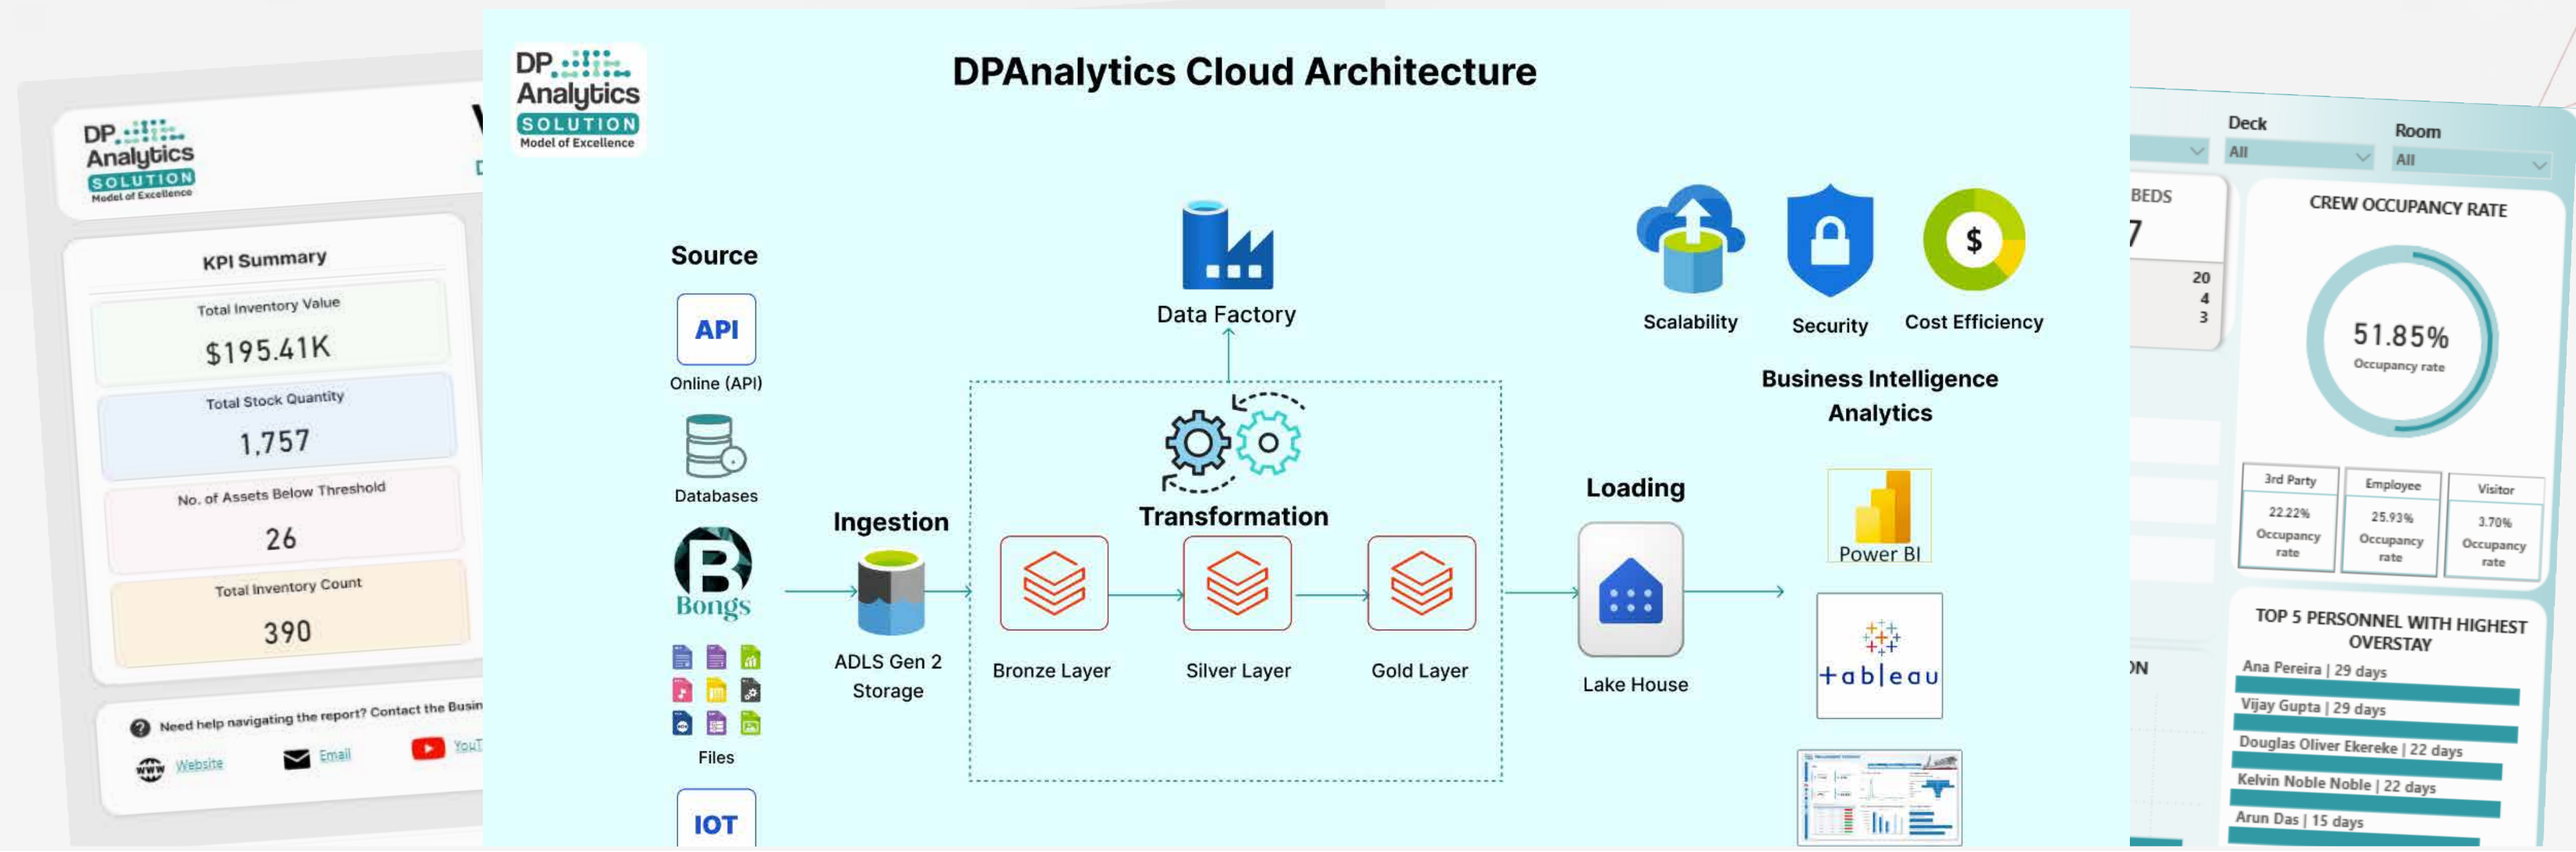

Our cloud-integrated architectures leverage Microsoft Azure, Oracle, AWS, and Google (GCP) to deliver seamless connectivity, resilience, and scalability. We specialize in hybrid deployments that unify systems, data, and devices into a secure, intelligent ecosystem.

Business Intelligence & Advanced Analytics

We connect assets, sensors, and processes into a unified digital fabric. By integrating IoT, AI, and automation, we unlock predictive visibility, optimize equipment performance, and empower industries to transition from reactive to proactive operations.

Training & Consultancy Services

We bridge technology with people. Through strategic training programs, digital transformation consulting, and system adoption workshops, we help organizations build internal capability, drive operational excellence, and sustain competitive advantage in a data-driven world.

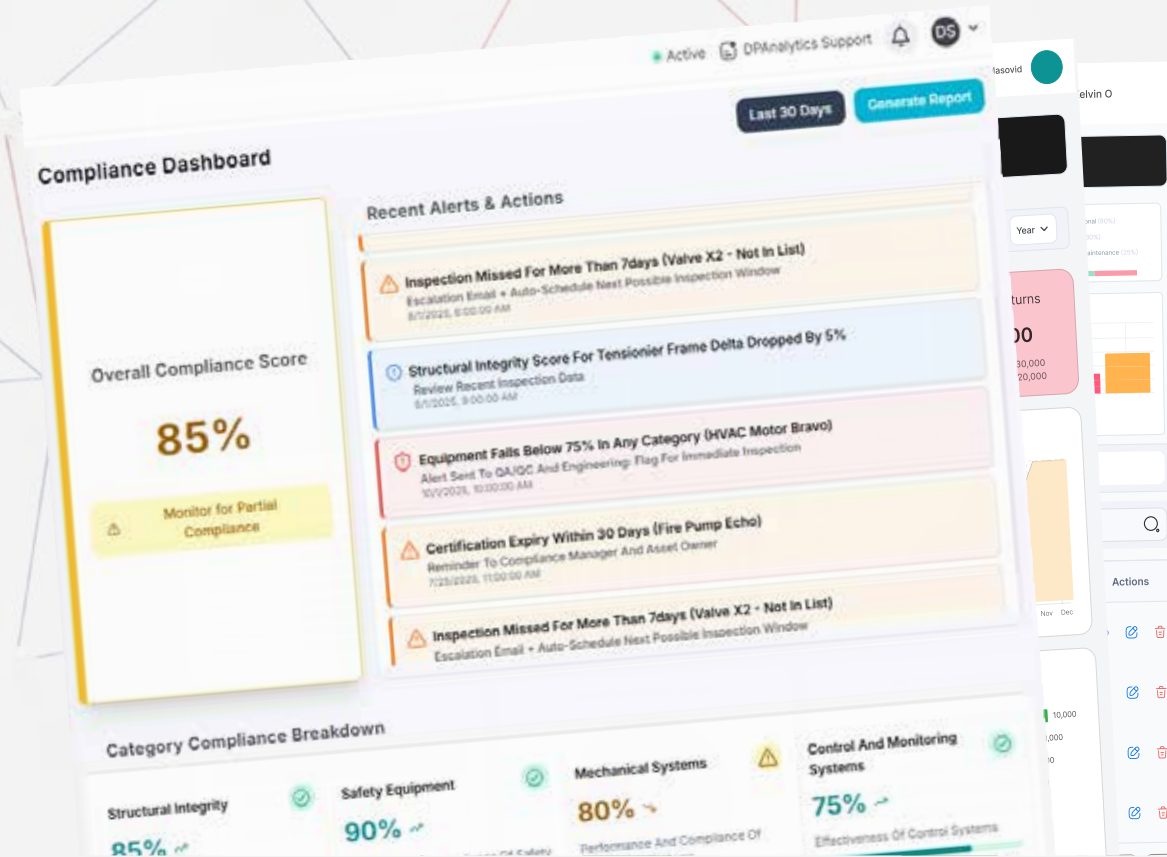

SOLUTIONS

Software Platforms We Have Built or Are Actively Developing

BONGS ERP: Vessel and Barge Operation Network and Global Solution

A fully modular Enterprise Resource Planning system for marine and offshore environments. BONGS integrates Asset Integrity Management, End-to-End Inventory Management, Procurement Workflow, and Crew accommodation Management into a unified system designed to enforce accountability and streamline operations.

Fuel Consumption Analytics and Management System

A system for real-time fuel tracking across tanks and generators. The platform will use artificial intelligence and machine learning to predict maintenance, detect anomalies, and optimize fuel consumption using flow meter data and automated reporting tools.

Drilling Operations Management System

CLIENT SOLUTION

A planning and performance management platform for drilling programs, including modules for Planning and Phase Design, Authorization for Expenditure Cost and Estimation, Operations Execution and Activity Tracking, and Lessons Learned and Knowledge Capture.

CargoStation:

CLIENT SOLUTION

Digital Delivery and Logistics Visibility System. A dynamic logistics and dispatch platform with live tracking, route optimization, digital proof-of-delivery, and vendor performance monitoring.

Real Estate Software Platform:

CLIENT SOLUTION

A scalable platform connecting developers, agents, and buyers with features for property listings, customer interaction, offer submission, and analytics dashboards.

MEASURABLE BUSINESS IMPACT

At DPAanalytics Solutions, digital transformation is not just a promise, its measurable progress. Our AI-driven, cloud-integrated solutions deliver quantifiable results across operations, safety, and profitability.

30%

OPERATIONAL COST OPTIMIZATION

Intelligent automation and workflow digitization reduce operational expenses by up to 30%, eliminating inefficiencies, optimizing procurement, and extending asset life cycles.

98%

PROCESS EFFICIENCY & COLLABORATION

AI-powered workflows accelerate approval cycles and enhance cross-department collaboration, delivering 60% faster process execution across asset Integrity management, inventory, procurement etc.

100%

SEAMLESS DIGITAL INTEGRATION

Our cloud-based architecture achieves 100% interoperability across ERP, IoT, and analytics platforms, ensuring unified visibility and real-time synchronization between teams and systems.

95%

COMPLIANCE & CERTIFICATION RELIABILITY

Centralized asset registers automate license tracking and certification renewals, achieving 98% compliance accuracy and eliminating costly missed deadlines

35%

PREDICTIVE EQUIPMENT RELIABILITY 35%

Through machine-learning algorithms and IoT telemetry, our systems predict failures before they occur, improving uptime by 35% and cutting unplanned downtime

25%

SAFETY, UPTIME & WORKFORCE PRODUCTIVITY

AI-enhanced monitoring boosts safety and equipment availability by 25% or more, helping organizations shift from reactive maintenance to data-driven reliability.

INDUSTRIAL COVERAGE

- Oil & Gas (Upstream, Midstream, Downstream)
- Marine & Offshore Services (FPSOs, Pipelay Barges, Anchor Handling Vessels, Platform Supply Vessels)
- Petrochemical and Refining Operations
- Power & Energy (Thermal, Hydro, Gas Turbines, Power Distribution Infrastructure)
- Manufacturing (Heavy Industrial Plants, Refineries, Fabrication Yards)
- Utilities & Infrastructure (Water Treatment, Pipelines, Substations)
- Defense & Security Assets (Naval Operations, Base Equipment Infrastructure)
- Renewable Energy with Offshore/Industrial Infrastructure
